

NANOMEDICINE SYMPOSIUM: FROM THE LABORATORY TO THE CLINIC

April 28 9:30 am - 6:30 pm

Seminar Room, CIC biomaGUNE

Aitziber L. Cortajarena (CIC biomaGUNE)

Metallic Clusters for Biosensing

María Jesús Vicent (Príncipe Felipe Research Center)

Simplicity and Rational Design: Keys for Polypeptide-Based Therapies
Clinical Translation

Mariana Medina (CIC nanoGUNE)

Micro-Nanodevices for Diagnosis and Therapy of Infertility and Cancer

Maurizio Prato (CIC biomaGUNE)

Carbon Nanotubes and Spinal Cord Injury: A Bridge to the Clinic

Ibane Abasolo (CSIC, Barcelona)

Modeling Disease and Delivery: Animal Systems for Advancing
Nanotherapeutics

Eva del Valle (University of Salamanca)

From the Laboratory to the Pharmacy: Producing Nanotherapies

Paula Vázquez Aristizabal (CIC biomaGUNE and Onkoreplica)

From Bench-Engineered Microenvironments to Bedside
Applications: 3D Models in Translational Nanomedicine

Pannel Discussion

Clinical Translation of Nanomedicine: Challenges and Future
Perspectives
