### Symposium "Safety issues of nanomaterials along their life cycle"

4-5/05/2011

CIC biomaGUNE participated in the organization of the symposium "Safety issues of nanomaterials along their life cycle" 4th/5th May 2011 in Terrasa, Barcelona. Safety issues of Nanomaterials along their life cycle was a two day symposium jointly organized by three European projects: Nanopolytox (coordinated by Leitat technological centre, Barcelona), NEPHH (coordinated by Ekotek, Bilbao), and [HINAMOX](#) (coordinated by CIC biomaGUNE, San Sebastian). The aim of the Symposium was to discuss the human and environmental impacts of nanomaterials along their life cycle from their production through their processing, use and end of life (recycling and /or disposal.)The program included a panel of international experts.
